

Answering Economics Questions

State: This means a short sentence of explanation

Explain/Outline: State your point and explain it further (two sentences)

Describe/Discuss/Analyse: State, explain, then precisely develop the point further (follow the point through to its conclusion including economic impacts), **quoting** relevant policies, statistics or current trends where possible

NB: Always try to include examples in all answers, if times allows. Also, as a general rule, divide the question marks by 5 to give you the number of points required

(20 marks = 4 points of explanation)
